## ABOUT MILLY [github.com/millycodes](https://github.com/millycodes)

Software developer with experience building and maintaining custom responsive solutions for mobile & web. Proficient in Ruby, Javascript, complex layouts with CSS and HTML plus other modern libraries and frameworks. Passionate about accessibility and possessing knowledge in developing for browser compatibility and assistive tools to meet WCAG requirements. Committed to a web that works for everyone.

## EXPERIENCE

### **Teladoc Health, NYC — Software Engineer** December 2018 - Present

HTML, CSS, JavaScript, React, Elixir, Ruby, Rails in Agile development. Deployed documentation app with OpenAPI-Specification/YAML. Developed Sinatra & Rails API conversion for Mobile Applications. Built white label instances focused on responsiveness and WCAG compliant code for use with assistive tools for accessibility. Implementation of i18n practices in multiple languages to provide global internationalization and localization support for apps.

### **Code Nation, NYC — Front-End Developer & Code Instructor**

October 2018 - Present: 2nd Yr Fellowship @ Etsy

Volunteer Web Development mentor and instructor for under-resourced NYC DOE high school students. Lecturing and Project-based teaching of HTML, CSS, JavaScript, JQuery, React and professional skills.

### **NYC Tech Talent Pipeline, NYC — Web Development Fellowship**

June - December 2018

Immersive apprenticeship program designed to equip fellows with the in-demand skills necessary in web development and software engineering. Studying Git, jQuery, Sinatra, Rails, HTML, CSS, JavaScript, and Ruby. Regular participation in study groups and events to build on skills.
